Sent in by Mr. John Thies

Grass Tetany

(hypomagnesaemia)

We are seeing a lot of
this particularly now

that the grass is
growing extremely fast.

Your lactating cows
are the most at risk.

Remember when cows
are moved or stressed

during this time, this
can turn fatal very fast.

Usually feeding of a
high mag. mineral will

curb this problem until
the danger has pasted.

For more information

contact your local
veterinarian.
