MONDAY'S FEEDER CATTLE

Sale Starts 12:30 PM
RECEIPTS: 910

Feeder str & hfrs under 650# steady, over 650# \$2.00-\$5.00 higher. The surprisingly bullish cattle inventory report released last Friday afternoon that found total US cattle numbers to be less than expected had a positive effect on cattle prices Monday. Demand at the auction market was better for the heavier weight cattle than in past weeks & the live & feeder cattle futures markets closed with very strong gains at the CME.
